

28. Project: Renovation of East Erbil Emergency Hospital

Erbil East Emergency Hospital is one of the major health facilities in Erbil governorate, being an important secondary and tertiary centers and of the referral and drainage points for most of these services for the whole Erbil governorate, in addition to many areas in the nearby governorates of Kirkuk and Ninewa especially during the last few years of wars and instability, in addition to the new situation resulted from COVID-19 pandemic and the resulted regulations taken through specifying Erbil West Emergency Hospital for COVID-19 patients making the East Emergency Hospital providing the services for all the other cases in the whole Erbil city.

The increasing load and pressure on the facility from the growing needs of the beneficiaries is a challenging issue for the local health authorities, and make it obligatory to improve the service provision in the hospital through providing it with the needed capacity to deal with these needs.

As an effort to support Erbil East Emergency Hospital, Heevie Organization, and by the support of WHO, has started a project for performing renovation and rehabilitation of the hospital through increasing the capacity of the hospital regarding the space, patients' management and patient admission abilities.

The project will involve expansion of the reception unit and the adaption of the TRIAGE system in a way allowing better management for the different cases in an easier and more scientific way. The project is being implemented directly by Heevie engineering department with the support of the World Health Organization
